SafeNet® is SafeMobile's web-based software application that provides fleet managers with the ability to effectively manage and monitor their organization's mobile assets via any Internet connected computer anywhere in the world, using a standard browser.

www.safemobile.com

Welcome to SafeNet®, a revolutionary web-based application for MOTOTRBO® and TETRA® radios.

SafeNet is very easy to use. Just click and enjoy the benefits that this application brings to your workplace. SafeMobile configures your system, installs and tests on the spot. We then train your people and

you are ready to go. Since SafeMobile operates the network, you won't need to perform any software installations, network configurations, or maintenance. Ever! All you need to do is log in.

Our Customers Come First

SafeNet updates are always free of charge! Each customer can have up to three users per account and now, you can view your radios anywhere via our new Smart Phone Web Apps.

(see web site for tested phones)

Simple, easy to use suites include GPS Tracking, History, Reporting and Text Messaging.

- ✓ GPS tracking allows you to view your radio live on the map.
- ✓ SafeNet uses Google maps in map view, street view and satellite view.
- ✓ History plays back what roads or areas your radios have traveled and stores one year of data.
- ✓ Unlimited text messaging to and from your radios.
- ✓ Reporting Suite features nine different reports.
