

DA/Page™ guarantees that your internal alerts reach all of the right people, all at the right time. Efficiently bringing together the collective power of today's communications devices, DA/Page™ redefines effective messaging and response for the hospitality industry. From security to service staff, from management to customer service personnel, DA/Page™ ensures the reliability and security of internal alerts at all levels.

DA/Page™ is a customizable and competitively priced communications enhancement tool with specialized implementation for the hospitality industry. DA/Page™ seamlessly integrates with popular and proprietary CMMS options, securing your messages and enlarging the array of mobile devices available in your network to include mobile radios and other proprietary devices. Efficiency and usability are among our key features, with installation times averaging no more than four hours and no need for additional user training.

At DAPage, LLC we know that the security of your information is a priority. Our background providing information technology to emergency services for over thirty years gives us an edge in security and dependability that our customers can rely on.

DA/Page™ is part of the larger DA or "Data Access" family of communications products that we produce and support.

For more information on the DA product line, contact us at
770-399-9464 or email info@dapage.net.
